Week 11 : Assignment 11

Assignment not submitted Due date: 2021-10-13, 23:59 IST.

1)	Which of the following represents the IIoT Healthcare architecture in bottom-up order? a. Sensing, Sending, Processing, Storing, Learning b. Sensing, Processing, Sending, Storing, Learning c. Sensing, Sending, Storing, Processing, Learning d. Sensing, Storing, Sending, Processing, Learning
0	a. b. c.
2)	which of the following is not an IIoT Healthcare Security requirement? a. Confidentiality b. Integrity c. Ease of use d. Availability
0	a. b. c. d.
3)	QardioCore is an example of a. IoT-based blood pressure monitoring system b. Wireless ECG monitoring system c. IoT-based oxygen saturation monitoring device d. Wireless breathing pattern monitoring device
C	a. b. c. d.

4)	a. Different b. Product c. Ratio of	gen saturation calculated using pulse-ox nce of oxyhemoglobin from total hemog t of total hemoglobin and oxyhemoglobin f total hemoglobin to oxyhemoglobin f oxyhemoglobin to total hemoglobin	globin
	a. b.		
C	c.		
5)	Which of th	ne following represents the HoT Maturity	Model in correct order?
		nitor, Optimization, Control, Device auto nitor, Control, Optimization, Device auto	
		nitor, Control, Optimization, Autonomy, nitor, Optimization, Control, Autonomy,	
	a.		
	b. c.		
C	d.		
6)	AMI stands	s for	
		vanced Metering Infrastructure	
		omatic Metering Infrastructure vanced Monitoring Infrastructure	
		omatic Monitoring Infrastructure	
	ab		
	b.		
	c. d.		
	Ψ.		

7)	Which of the following is not a challenge for implementing IIoT in power plants? a. Determinism of network b. Low power devices c. Scalability issues d. None of the above
C	a.
8)	Which of the following are types of RFID tags? a. Active and Passive b. Wired and Wireless c. Real and virtual d. None of the above
C	a.
9)	Which of the following statements is true about barcodes? a. Barcodes cannot be forged b. Barcodes can be forged c. Multiple Barcodes can be read at the same time d. Both (b) and (c)
C	a. b. c. d.

Endpoint security refers to -	to
 a. Securing the tasks being performed on cloud b. Protection against phishing attacks c. Encryption of connection between a mobile device to a network d. Monitoring of mobile devices (files and processes) that access a network 	
○ a. ○ b. ○ c.	
● d. ₽	
14) Facility Management helps in reducing cost barrier by -	Ī
a. Increasing operating efficiency and reducing installation cost b. Increasing operating efficiency and reducing maintenance cost c. Increasing operating speed and reducing installation cost d. Increasing operating speed and reducing maintenance cost	
 ○ a. ○ b. ○ c. ○ d. 	
15) Four main components of facility management are -	Ī
a. Buildings, finance, contracts, and people b. Buildings, finance, contracts, and devices c. Buildings, finance, contracts, and information technology d. Buildings, finance, contracts, and administrative services	
 a. b.	
○ c.	
○ d.	
WEEK 11 2022A	

 iHealth BP5 is an example of an _____ a. IoT-based blood pressure monitoring system

2) patient.	smartphone apps help in detecting the health condition of a
a. Medical cob. Medical eoc. Diagnostio	
3) Which of the fo	
data collectors?	ollowing communication networks includes controllers, regulators, and a ood Area Network Network
O a. Smar	AMI consists of It meters munication networks (a) and (b)
_	e following is true about the digital twins in power plants? considered as virtual power plant

7) Which of the following is true about RFID tags?		
 a. Active tags do not have any internal power source b. Semi-passive tags have onboard battery 		
8) Which of the following statements is not true about barcodes?		
 a. Barcodes are printed on paper and plastic which makes them vulnerable b. Barcodes can contain added information)	
10) The full form of VPN is		
a. Virtual Private Network		
11) Which of these is/are the example(s) of VR?		
 a. Oculus Rift b. Samsung Gear VR c. Google Cardboard d. All of the above 		
12) What is the function of Firewalls?		
 a. Detecting and blocking tampering of data b. Encrypting connection between two hosts c. Acting as barriers between trusted internal network and external network 	\ vorks	
13) Which of the following support services is used for monitoring, gathering, and disseminating relevant information and making decisions in facility management?		
a. Administrative Support		

14) Which of the following is/are considered to be the application(s) of IoT in Facility Management?
O a. Lighting
O b. Refrigeration
O c. Smart Meters
d. All of the above
15) Which of the following describe(s) the benefit(s) of using IoT applications for Facility Management?
O a. Improve customer experience
O b. Prevent unauthorized access
○ c. Real time tracking
e d. All of the above
WEEK 11 2022B
 What are the benefits of IIoT health care? a. Hospital staff can predict the arrival of a patient in PACU. b. Hygiene monitoring system can detect the cleanliness of hand c. Both a) and b) d. None of the above
Оа
Ob
◎ c
"Markerless AR technology is also known as position-based or location-based AR". True or false? a. True b. valse
◎ a

3)	Which of the following is/are smart phone-based healthcare app? a. ECG self-monitoring b. Instant heart rate c. Fingerprint Thermometer d. All of the above	
(a b c d	
4)	Which of the following is/are the benefits of digital powers. Improves performance b. Reduce cost c. Reduce energy and demand d. All the above	er plant?
	a b c d	
5)	WiMAX is a wireless a. Wide area network b. Field area network c. Neighborhood area network d. None of the above	
	○ a ③ b	

6) What is/are the Communication network(s) used in Advanced Metering Infrastructure (AMI)? a. Broadband over power-line b. Fixed radio frequency c. Neither a) nor b) d. Both a) and b)
○ a ○ b ○ c ◎ d
7) What are the components of RFID tagging system? a. The RFID tag and host system b. The RFID tag, read/write device, and host system c. The RFID tag, transmitter, and host system d. The RFID tag, read/write device, and transmitter
○ a
8) Which RFID tags broadcasts information signal in the form of a beacons? a. Active b. Passive c. Semi-Passive d. None of the above
9) How are RFID tags used in transportation? a. Track time and place of congestion b. Compute delay and alternate routes c. Commute with efficient time and mode d. All the above
O a
○b ○c

What is authenticity in software security? a. Access control based on these credentials b. Assurance that data is not altered by unauthorized people c. Ratio of time of functioning to the total time d. None of these
○ a
Why do we use Intrusion prevention systems? a. Prevention of unauthorized sharing of sensitive data b. Detection of abnormal behavior by the network c. Detection and blocking attacks d. All the above
○ a ○ b
○ c
Which of the following is not true about AR? a. Enhanced reality b. Can add details to things a user tries to examine c. Isolate the users from the current world d. None of the above
○ a ○ b ◎ c

13)	What are the applications of IoT in Facility Management? a. Room Reservation and Scheduling b. Monitoring Stock and Usage of Supplies c. Both a) and b) d. Neitner a) nor b)
C	a b c
1	14) What are the benefits of facility management? a. Improve customer experience b. Prevent unauthorized access c. The ability to do more with less d. All of the above
	○ a○ b○ c○ d
15)	What is long form of HVAC? a. Heating Ventilation and Air-Cleansing b. Heating Ventilation and Air-Conditioning c. Heavy Ventration and Air-Conditioning d. Heating Variation and Air-Conditioning
	O a D b

WEEK 11 2023A

What is/are the challenges associated with healthcare?
(a) Populations are aging all over the world
(b) Different diseases are increasing
(c) Expenditure of hospitals and medical clinic are increasing
(d) All of the above
2) The number of persons aged 60 years or over is expected to increase more than during 2017-2050.
(a) Double Triple
(c) Quadruple
O (d) Quintuple
-34 *
3) Which of the following factor(s) is/are considered in authentication in the context of software security?
(a) Identification of user
O (b) Verification of credentials entered (local or remote)
(c) Protection of resources
(d) All of the above
4) The key factor(s) of software security in the context of plant security and safety is/are
○ (a) Integrity
O (b) Authentication
O (c) Availability
(d) All of the above

 (a) Accessing new insights (b) Implementing new technologies (c) Addressing cost barriers (d) All of the above
6) Which resource(s) is/are optimized in the IoT-based facility management system?
(a) Manpower (b) Assets (c) Technology (d) All of the above
7) Which parameter is monitored by the device developed by Dexcom? (a) ECG (b) Blood (c) Glucose (d) Respiration rates 8) "Asthma is lifelong disease, can be controlled, not cured" state whether the following statement is true or false.
O (a) True
9) Which of the following parameter(s) is/are monitored by ADAMM?
 (a) Asthma (b) Blood pressure (c) Body temperature (d) Oxygen saturation level
10) Select the correct option (s) from the below.
 (a) Google Fit: Keeps track of different physical activities (b) Health Assistant: Keeps track of health condition (c) Fingerprint Thermometer: Determine body temperature from the fingerprint (d) All of the above

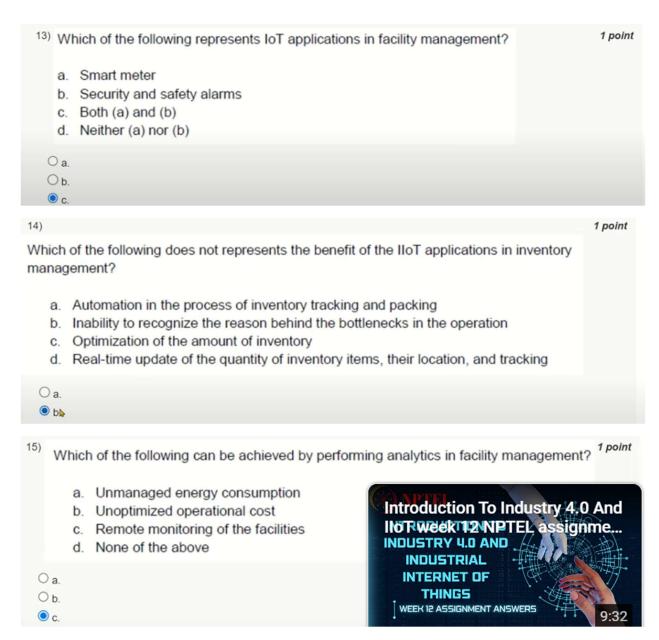

11) Which of the following feature(s) act(s) as the drivers of IIoT in a power plant?	
(a) Low cost powerful chips	
(b) Standardization with IPV6	
(c) Standardization with software technology	
(d) All of the above	
12) Which option(s) is/are included in the power flow of a smart grid?	
O (a) Generation	
O (b) Transmission	
(c) Distribution and consumption	
(d) All of the above	
13) Inventory management activity entails	
(a) Controlling, overseeing, and ordering	
O (b) Storage	
(c) Determine supply for sale	
(d) All of the above	
14) What is/are the component(s) of a facility management system?	
(a) Buildings	
O (b) Finance	
O (c) People	
(d) All of the above	
15) The IoT-based remote patient health monitoring system is more	
○ (a) Robust	
O (b) Costly	
O (c) Secure	
(d) All of the above	

Week 11 2023B

1)	1	1 point
Which of the following is/are the major challenge(s) associated with the heat a. Drug overdose b. Wrong drug prescription c. Costly hospitals and clinics d. All of the above	Ithcare industry?	
O a.		
O b.		
● c.		
2) Fill in the blanks is an example of a wireless ECG monitoring a. QardioCore b. BMP280 c. ESP8266 d. BME280	ng device. 1	point
🏩 a.		
Which of the following is a body temperature monitoring device? a. Ihealth BP5 b. Kinsa smart thermometer c. Dexcom d. ADAMM		1 point
O a.		
● b.		
S D.		
4) Which of the following represents an intelligent asthma monitoring device a. BME280 b. Kinsa smart thermometer c. ADAMM d. Dexcom	e? 1 <i>p</i>	oint
○ a.		
○ b.		
◎ c.		

5) Which of the following does not represents the challenge of IIoT in a power plant? a. Security issues b. Scalability issues c. Smart metering d. Low power devices	oint
○ b. ⑥ c.	
Fill in the blanks is the full form of SCDA. a. Supervisory Control and Data Acquisition b. Superlative Control and Data Acquitance c. Supervisory Condition and Data Acceptance d. None of the above	point
● a.	
7) Which of the following does not represents communication networks? a. Home area network b. House area network c. Wide area network d. Neighborhood area network	oint
● b.	
State true or false — RFID tagging system comprises of RFID tag, read/write devices, and a host system. a. True b. False	
9) Which of the following is true about passive RFID tags? a. Broadcasts information signals in the form of a beacons b. Relies on backscattering c. Have longer range than active RFID tags d. Bulky and expensive as compared to active RFID	point
O a.	
● b.	

WEEK 11 2024A
